

SCC #20

The text in sections G.3.3.1 and G-3.4.1 of MIL-STD-188-220B is not consistent with the contents of the Field Fragment column in Tables G-4 and G-6, respectively.

a) Change the fourth and fifth sentences of the third paragraph in G.3.3.1 (page G-14) to:
"In the fifth column, Field Fragments, the bits of each field are placed in octets. The bits(s) of each field are positioned in an octet such that the ~~LSB-MSB~~ of the field is positioned in the ~~least-most~~ significant unencoded bit of the octet, the next ~~LSB-MSB~~ of the field is placed in the ~~Next-last~~*next most* significant unencoded bit of the octet, and repeated until all of the bits of the field have been encoded."

b) Change the fourth and fifth sentences of G.3.4.1 (page G-17) to:
"In the fifth column, Field Fragments, the bits of each field are placed in octets. The bit(s) of each field are positioned in an octet such that the ~~LSB-MSB~~ of the field is positioned in the ~~least-most~~ significant unencoded bit of the octet, the next ~~LSB-MSB~~ of the field is placed in the next ~~least-most~~ significant unencoded bit of the octet, and repeated until all of the bits of the field have been encoded."
