

**SCC #40 APPROVED 7 DEC 99**  
**MIL-STD-188-220B**  
**Clarify Node Status Byte**

**Redlined**

5.4.1.2.4. Node Status Byte. The *i*th Node Status Byte characterizes the link between originator host (the host whose address appears in the originator address of the intranet header) and the *i*th node predecessor whose address immediately follows the Node Status Byte as defined in Figure 29.

**Change Applied**

5.4.1.2.4. Node Status Byte. The *i*th Node Status Byte characterizes the link between originator host (the host whose address appears in the originator address of the intranet header) and the *i*th node predecessor whose address immediately follows the Node Status Byte as defined in Figure 29.
