

SCC #43 APPROVED 7 DEC 99
MIL-STD-188-220B
Typographical Errors

- Page 5-15, Section 5.3.4.1.1, 3rd sentence is missing the “U” in front of PDU.

U PDUs provide acknowledgement, and station identification/status information for Type 1 operations.

- Page 5-19, Section 5.3.4.2.2.2.5, has two “g”s in the outline. The second one should be an “h”.

hg. A station that optionally implements multicast (group and global) addressing shall also be capable of sending and receiving multicast, special and individual addresses “mixed” in a destination subfield.

- Page 5-50, Section 5.3.7.3.5.2.2, in the exception, change “addresses” to “addressed”.

Exception: A Station may include a busy destination in a PDU that is addressedds to multiple destination addresses if at least one of the multiple destinations is not busy.

- Page 5-67, Section 5.4.1.2, the word “node’§s” should be “node’s”.

This information can be partially determined passively by listening to a node’§s traffic at layers 3a and 2 and/or actively by exchanging topology information.

- Page 5-68, Section 5.4.1.2.2, the word “originator§s” should be “originator’s”.

Together with the originator’§s link layer address, the Topology Update ID uniquely identifies each topology update generated by the originating node.

- Page E-1 and E-2 both have a Section E.4. The one on E-2 should be removed.
